

Grade 4-6

The Snakes of BC Pin Project

Complete this project to earn your pin!

1. What type of animal is a snake (circle one)?

Bird Mammal Reptile Insect

2. Do all snakes lay eggs?

3. Are snakes cold blooded or warm blooded?

4. What is a species?

5. How many snake species are found in British Columbia?

6. What is the name of the venomous snake species that is found in BC?

7. If you find a snake in the wild what should you do with it?

8. Food Chain Unscramble

A food chain shows the feeding interactions between different living things! Plants (producers) are always at the beginning of the food chain, followed by a prey animal. Snakes are both prey animals and predators so they are usually located in the middle of the food chain. Cut the animal pictures out below and paste them onto the next page in the correct order!
